Course Description

In this course, students will demonstrate the ability to undertake lifelong self-directed learning by designing and executing an experiential learning project. The learning endeavor involves identifying a topic of interest, establishing measurable outcomes, employing multiple learning strategies, and reflecting on the learning methods used. A final product and class presentation comprise the chief deliverables.

Learning Outcomes

After completing this course, you will be able to:

- Articulate the meanings of experiential and self-directed learning.
- Describe divergent and convergent thinking and explain their uses in developing ideas.
- Understand and define the key characteristics of a motivated self-directed learner.
- Analyze and describe how the learning process changes the brain and how the brain turns experience into learning.
- Apply key components of critical thinking to investigate, compare and contrast expectations with outcomes.
- Identify learning styles in order of preference and apply appropriate learning methods to strengthen least preferred styles.
- Examine and apply one or more models/theories of learning from experience through reflective writing.

- Identify and explore potential applications of what one has learned to new circumstances.
- Design and carry out a meaningful experiential learning project that exhibits control of the learning methods used.

Learning Strategies and Resources

Our online class learning strategies include module overview readings on key concepts, reading material from theorists and other researchers, viewing of/listening to online media, brainstorming and self-assessment exercises, structured online discussions on assigned readings and topics, course concepts and learning goals, and there are optional synchronous virtual sessions which are opportunities to engage with your instructor and peers. Written assignments (which includes posts in discussion forums) are designed to help students to develop an understanding of important course concepts and to begin to apply these concepts. Each course module will provide additional tools and resources that are of particular relevance for each week's required tasks. This course includes four Optional Zoom sessions.

Required Readings

Books and learning materials are available at the DePaul bookstore, at <http://depaul-loop.bncollege.com>, or through alternative sources.

Purchase the Kolb Experiential Learning Profile (KELP) for \$35.00 at this [site](#). This is a required assessment for this course – once you purchase this you will complete the assessment online and the results will be visible to you.

Additional readings may be available on Electronic Reserve, at the [DePaul Library](#). Login to Ares Course Reserves and select the course. Log in using your Campus Connect User ID and password. You will then get a page listing the courses in which you're enrolled that have readings posted in Ares. Click on the title of this course and the list of our electronic reserve readings will be displayed.
