Course Description

Adult life has become complex. With expectations from family, school, work, home, social pressures, technology and social media, it sometimes feels impossible to keep up. When the news bombards us or becomes frightening, and the world around us feels uncertain, how do we make sense of things and find our way forward? In this course, we will begin from the place that human beings are full of creativity, ingenuity, resourcefulness, generosity and hope. Our very lives and the world around us will be our subject matter - our need to work, our bodies' need for rest, and our enjoyment of leisure and recreation. Where does stress, expectation and anxiety come from, how are these held in the body, and what can we do about it? And, how has story, movement, music and sound, humor, popular entertainment and fun helped humans get through the day, navigate relationships, and find more ease? By engaging in simple creative practices in and out of class and considering what might be useful for individual and collective well-being, the goal is for students to create a toolbox of approaches for navigating life's complexities to carry forward beyond the class.

Learning Outcomes

After completing this course, you will be able to:

- Understand the nuances of complexity that adults face in modern life in the western world, and especially in the United States.
- Grasp and articulate the kinds of complexities you are personally navigating in your own adult life.
- Understand different modalities for managing complexities and stress offered by various thinkers, practitioners, models and approaches to health and wellbeing,
- Identify what/when/where your own adult-life challenges come into play, and cultivate tools to help you manage these complexities.

- Have an experientially-based understanding of mind-body and somatic practices and their value in navigating complexities of adult life.
- Understand the significance of the stressors existing in our modern world in relation to technological advances and their impact on humans.
- Understand the value of collaboration and community in relation to mitigating stress and navigating complexity.
- Find applications of your learning in this class to home, school, family, work, and in your digital connections and communities

Learning Strategies and Resources

Some learning activities, assignments and deadlines will vary depending on the delivery format of the course and may differ slightly from what is presented in this document.

Learning will occur in several modalities and will include virtual meetings with experientially-based guided movement, storytelling and vocal activities facilitated in each class session combined with a reflective component. Asynchronous D2L sessions will be an opportunity to reflect and synthesize learning. The study and discussion of literature (articles, books, websites and videos) concerning mind-body awareness will occur across all classes and assignments.

Required Readings

There is no textbook required for the course. Required readings and media (videos and podcasts) will be available on Electronic Reserve, at the [DePaul Library](#). Login to Ares Course Reserves and select the course. Log in using your Campus Connect User ID and password. You will then get a page listing the courses in which you're enrolled that have readings posted in Ares. Click on the title of this course and the list of our electronic reserve readings will be displayed.

Learning Deliverables

Students taking the course for either 2 credits or 4 credits have the following assignments.

1. Weekly readings and media components
2. In-class writings
3. Easy Focus Learning Plan
4. Work, Play, Rest Learning Storybook
5. Integrating Ideas Showcase
6. D2L Forum work in WEEK 6

Students taking the course for 4 credits have the following additional assignments.

7. D2L Forum work in WEEK 9
8. Interview with a "Grace Maker"
9. Integrating Ideas Project
