COURSE DESCRIPTION

This course provides the structure and guidance to complete a culminating applied project in your professional area. You will create an applied artifact expressing the core and advanced skills and knowledge developed in your major, and justify its form and content by analysis of relevant scholarship. Project implementation, data analysis, developing an artifact, assessment of project effectiveness, and a formal presentation of the artifact to an audience comprise the key course activities. (6 credit hours) (formerly, DCM 322)

[LL 300](#) or [LL 301](#) or DCM 309 is a prerequisite for this class.

LEARNING DELIVERABLES (GRADED EVIDENCES OF LEARNING)

This course uses the following learning approaches:

- Weekly discussion forums that focus on topics relevant to the ten modules of the course.
- Weekly assignments (submissions) that scaffold towards the development of the Capstone Project.
- A final draft of your completed Capstone Project.
- A class presentation of the form, purpose, and content of your Capstone Project.

To complete the course, students must fulfill each of the assignments as described in the course and submit them to the instructor by the assigned deadline in D2L's course submission area. In addition, students must participate in the course discussion forums by responding to all discussion instructions and by interacting with fellow classmates, as required.

ZOOM SESSION SCHEDULE

This Capstone Project course is largely asynchronous online. To foster interaction there will be several Zoom sessions scheduled for Tuesday evenings. Rather than lectures, these sessions will be flipped classroom sessions providing students an opportunity for question and answer with the instructor, general discussion, and a platform to report on progress towards completing the steps to a final Capstone Project. While Zoom sessions will not be weighted into the grade (except for the Capstone Presentations) it is highly recommended that students attend. Sessions will not be recorded.

COURSE POLICIES

Describe here the specific policies and procedures the instructor has for the course that are additional to the college/university policies, for example, classroom/discussion etiquette, late work, code of responsibility, etc. Include how changes to the syllabus will be communicated. (Changes to the originally published course syllabus used to select/register for a course should be communicated in the first session/week of the course in writing; if significant assignment changes are made during the course it should be done officially with the consensus approval of students.)

Select the applicable policies below (i.e., UGRAD and/or GRAD) depending on the level of your course. Include the statement:

This course includes and adheres to the college and university policies described in the links below:

[APA citation format](#) (GRAD)[Academic Integrity Policy](#) (GRAD)

[Academic Integrity Policy](#) (UGRAD)

[Incomplete \(IN\) and Research \(R\) Grades Expiration Policy](#)

[Withdrawal/Drop Policy](#) and [Withdrawal Tuition](#)

[Accommodations Based on the Impact of a Disability](#)

[Protection of Human Research Participants](#)

Students are also invited to contact me privately to discuss your challenges and how I may assist in facilitating the accommodations you will use during this course. This is best done early in the term and our conversation will remain confidential.

COURSE NETIQUETTE

Online discussions are an important part of the course experience. To ensure a positive learning environment, students should follow the guidelines below:

- Be polite
- Respect other participants' views or opinions
- Think before you write, and ask yourself if you would say the same thing in person
- Use positive phrases (i.e., "Good idea!" or "Thanks for the suggestions," etc.)
- Be sensitive to cultural differences
- Avoid hostile, curt or sarcastic comments
- No objectionable, sexist, racist, or politically intolerant language will be accepted.
- Create a positive online community by offering assistance and support to other participants.
- Use correct grammar and syntax

COURSE AND WORKLOAD EXPECTATIONS:

WORKLOAD, TIME MANAGEMENT, AND ATTENDANCE

This **online asynchronous** course is not self-paced and requires a regular time commitment each week throughout the quarter. Students are required to log in to the course at several times a week so that they can participate in the ongoing course discussions. Students are highly encouraged to participate in the

synchronous Zoom activities.

Online courses are no less time consuming than onsite courses. Students will have to dedicate some time every day or at least every second day to their studies to do excellent in *Capstone Project*. **As a 6-quarter hour course the expected student workload is greater than a regular 4 quarter hour course.**

DISCUSSION FORUMS

Discussion Forums are an important component of a student's online experience. This course contains discussion forums related to the topic(s) students are studying each week. A Course Q & A discussion forum has also been established to manage necessary, ongoing social and administrative activities. This is where the management and administrative tasks of the course are conducted, and where students can ask 'process' questions and receive answers throughout the course.

SYNCHRONOUS LEARNING ACTIVITIES

Students interact with other students and the instructor during scheduled Zoom sessions). This course also involves a short synchronous summary Zoom presentation of the Capstone Project by all students in the final weeks of the course.

INSTRUCTOR'S ROLE

The instructor's role in this course is that of a discussion and project facilitator as well as learning advisor. It is not their responsibility to make sure students log in regularly and submit their assignments. The instructor will read all postings to the general discussion forums but may not choose to respond to each posting. Students will receive individual feedback to all assignments through the D2L assessment system.

INSTRUCTOR RESPONSE TIME

Students will receive timely response to questions and input on D2L or by direct e-mail. Students will receive a response to emailed or posted queries within 48 hours during business days.

STUDENT'S ROLE

Online students must take a proactive approach to their learning. As the course instructor's role is that of a learning guide, the role of the student is that of the leader of their own learning. Students will be managing their own time to assure completion of the readings, activities and assignments for the course. In addition, students are expected to take a more active role in peer learning expressed in the discussion forums and in group learning during Zoom activities. A key to success in online learning is keeping pace with the sequential activities of the course and not falling behind.

INSTRUCTOR BRIEF BIO

Kevin F. Downing, Professor – DePaul University

Dr. Downing is a Professor at DePaul University's college for adult learners, the School of Continuing and Professional Studies. His research interests include the investigation of Miocene fossil mammals, Evaluating Ocean Acidification Events (OAE) From Fossil Coral Skeletons, and online science learning practices. He is the author of numerous

publications in geology, paleontology and science education and is the co-author of the book, *Online Science Learning: Best Practices and Technologies*. Dr. Downing received B.S. degrees in Astronomy and Geology (University of Illinois-Champaign), an M.S.T. in Geology (University of Florida-Gainesville), and Ph.D. in Geoscience with sub-specialization in Evolutionary Biology and Ecology (University of Arizona, Tucson).

ADDITIONAL CONSIDERATIONS

Additional information for the instructor's consideration in planning the syllabus may be provided in this section, especially to address unique programmatic needs.

Recording of Classroom Sessions Conducted via Videoconference tools:

- Synchronous teaching sessions can be recorded by the instructor for educational purposes. These recordings will be made available only to students presently enrolled in the course via password protected links. Links will be posted via the course webpages on D2L and viable for the present term only.
- Students are prohibited from sharing class recordings or disclosing the links to a class session to anyone outside of the course.
- Students have the right to protect their privacy during recordings by appearing in an audio-only mode; pseudonymous usernames can be used by students, if shared offline with the instructor.
- Instructors may retain portions of the recordings that contain their intellectual property consistent with University policy, with students' identifying information removed.

CHANGES TO SYLLABUS

This syllabus is subject to change as necessary. If a change occurs, it will be clearly communicated to students.
