Healthcare Administration (BA)

Description

The Bachelor of Arts in Healthcare Administration is designed for working adults seeking to advance their careers in Healthcare or those who desire to redirect their careers to the Healthcare area. The degree advances the development of a student's professional portfolio with further study in a range of subfields associated with Healthcare, business administration, and management. This degree emphasizes immediate practical application of academic knowledge and skills in the Healthcare workplace. In this program, students examine their prior and current work experience in light of theory and principles, while applying their new learning to solve current workplace challenges.

Program Features

- Designed for working adult students with flexible scheduling including online options
- Financial Aid, flexible payment options, and **special adult student tuition pricing available**
- Acceleration and affordability through transfer credit and prior learning assessment (PLA) credit
- Opportunities to combine bachelor's and master's programs and apply graduate courses to both programs
- Individualized program planning, course selection and advising assistance provided
- Enhanced career opportunities through professional portfolio development, instruction from industry practitioners, and wide-ranging Career Services support
- Degree granted by DePaul University, with its excellent academic reputation and the opportunity to join its prestigious and extensive alumni network

You will gain the following proficiencies

- Competence in the five **Healthcare Leadership Alliance (HLA)** competence areas: (a) Leadership; (b) Knowledge in the Healthcare Environment; (c) Business Knowledge and Skills; (d) Communication and Relationship Management; and (e) Professionalism.
- Connections of academic learning to workplace experience
- Deepened and expanded professional expertise
- Complementary multidisciplinary, applied, and integrative liberal arts curriculum
