The ***MSAT Program Guidebook*** as well as other resources posted on the program’s website serve as the primary policy and procedure materials for the ***Master of Science Program in Applied Technology (MSAT)***. As such, their purpose is to promote understanding between and among ALL program participants (graduate students, staff, faculty, faculty mentors, etc.) and enhance a smooth progression for all throughout the curriculum.

At the beginning of each MSAT student’s program, a “hard-copy” of the ***MSAT Program Guidebook*** (current version) is printed from the program website for purposes of discussion within the program’s early component (AT-580 • *Introduction to Applied Technology*). Notwithstanding this “hard-copy” version of the guidebook, the guidebook’s **OFFICIAL** version is available on the program’s website.

<http://snl.depaul.edu/student-resources/graduate-resources/Pages/guidebooks.aspx>

All materials posted on the program website (including the ***MSAT Program Guidebook***, Graduate Registration Bulletin and an array of Student Resources) are the most recent and take precedence over all previous versions. Such materials are “in effect” unless otherwise superseded by University directives and/or more subsequent editions posted on the website.
